Project 2

Semester: Fall 2016

Section:001

Instructor: Dr.Le Gruenwald

Group Project Number: 17

Group Members:

Catherine Ha

Sekar Rizky Rachmawati

Yunjie Wen

Score:

Problem 1:

a) Write a description for the attached ER diagram

- Company has a name and location. Name is a unique identification. Each company can be owned by a parent company. A date is associated with the acquired action. Each parent company can have many child companies, but each child company can only have one parent company.
- Reservation agreement has an ID and payment. ID is the unique identification. A date is recorded when companies, reservation agreements, and venues make a reservation. The date can be recorded when zero or more companies, zero or more reservation agreements, and zero or more venues, participate in making a reservation.
- A Venue is a place to hold activities. Each venue is uniquely identified by the combination of name and address. A venue also has an organizer. Venue can be an unstaffed venue or a staffed one, or neither of them, but the venue can't be both a staffed and an unstaffed venue
- The total area available is kept track of for an unstaffed venue and the budget is noted for a staffed venue.
- Each Venue has one or more rooms. Each room has an unique number. Each room also has a capacity. Multiple rooms may be associated with one venue. A room has at least one venue associated with the room.
- A Staff member has an id as unique identification. A staff member has a name, which includes a first name and last name, and phone numbers.
- Staff members work on jobs. A job has an unique id. Each job has a start date, end date, and payment properties. A staff member can work on many jobs. A job might have many staff members that entitled to the job.
- One staffed venue employs at least one or many staff members. A staff member must be employed by at least one staffed venue. A staffed venue may employ staff members.
- Each staff member working on jobs can sign contracts. A contract has unique contract id, in addition to the date the contract was signed and the contract details. A contract can only be signed by one staff member that works on a job.

b) Relational Database
